DETAILED ACTION

1. The claims are now directed to a dedicated control path for each of a plurality of distributed processors, wherein the separate control path resources prioritize internal and external control information such that the external control information is given a higher priority.

However, the specification is not confined to only the defined invention within the claims. Thus a new Specification (including Drawings and Abstract) is required which modifies the brief summary of the invention and restrict the descriptive matter so as to be in harmony with the claims as they currently stand within this Application. Per MPEP 1302.01 patents should be confined in their disclosures to the respective inventions patented (see 37 CFR 1.71 and 1.73) and not complicated by extraneous matter. In doing so, the applicant is reminded to include all related United States Patent Application (i.e., Abandoned, Pending, or their corresponding United States Patent Number). The applicant is further reminded of the provisions of 37 C.F.R. 1.125, with respect to mark-up versions and to add a statement, on a separate paper that the Substitute Specification contains "No New Matter".

In addition, Examiner requests that Applicant update the "Related Applications" section of the specification (and insert the title "Related Applications" for this section).

Amendments should include the patent number for 09/777,468 and the fact that the following Applications are now abandoned: 09/756,936; 09/687,191; 09/669,364; and 09/663,947.

These changes, **and other probable changes** to the status of the related Applications, should be made by the Applicant before the present Application is allowed.

Allowable Subject Matter

2. Claims 1 – 14, 16 – 20, 22 – 28, 30, and 32 – 35 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not specifically disclose or remotely suggest

With regard to independent claims 1, 13, 17, 19, 23, 28, 30, and 35:

wherein the separate control path resources prioritize internal and external control information such that the external control information is given a higher priority.

4. These limitations, in conjunction with the other limitations in the independent claims, are not specifically disclosed or remotely suggested in the prior art of record.

A review of claims 1 – 14, 16 – 20, 22 – 28, 30, and 32 – 35, in view of the Examiner's arguments above, indicates that claims 1 – 14, 16 – 20, 22 – 28, 30, and 32 – 35 are allowable over the prior art of record.

Conclusion

5. This application is in condition for allowance except for the following formal matters:

The above specification and drawing objections.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

6. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
